A Personal Note

FROM THE DESK OF

JOSEPH F. MARTIN

Twenty Years Ago . . .

Out of half a lifetime of previous association with the horticultural world, there was born among the horticultural enterprises in America, The Joseph F. Martin Co., perennial specialists. While we were yet in our infancy, we determined those policies which should govern our relationships, and which would live with us throughout the life of our enterprise.

Every plant produced by the Joseph F. Martin Co. was to be a star salesman.

No plant would ever be submitted for sale until its practical worth to the Florist, Landscaper, or Nurseryman was a proven quality.

We would ever remain enthusiastically alert in the development and procurement of new and novel plants for submission to our customers.

A plant produced by the Joseph F. Martin Co. was to be unexcelled, under any conditions, anywhere.

As a result of our faithful adherence to these policies formulated twenty years ago, the Joseph F. Martin Co. has become firmly entrenched in its position as the foremost hardy plant nursery in existence.

Our customers, by learning that an investment in our perennials was sure to produce liberal dividends in extra profits, have contributed to our organization the prestige which we now enjoy.

With this, the Twentieth Spring Edition of our wholesale hardy plant catalog, we seek to accomplish a dual purpose. To our customers, we wish to express our thanks for your past consideration, and we look forward to a long and extended period of business relations with you. To you who will be with us for the first time, we sincerely invite your patronage, and we earnestly look forward to being your source of supply in the future. To both we pledge the same consistency which has characterized our operation in the past—a Joseph F. Martin Co. customer shall be a well served and a well satisfied customer.

Gratefully,

Joseph F. Martin

While the following varieties of Verbenas are classified as hardy, we recommend a slight protection of straw or cornstalks during the winter months. All of the Verbenas offered here are ever-bloomers; they will continue in full flower until cut down by frost. They make the grandest show in the garden and are also valuable for cutting.

NEW PINK BUDDLEIA

Charming

A Distinct New Introduction

See Color Plate—next page

Develops into a beautiful bushy plant, growing to a height of 5 to 6 feet and almost the same in spread. Makes a very striking plant in any landscape, flowering from the middle of June until frost. The individual flower heads are quite large and when fully developed they make a solid round head opening full length.

The flowers are a clear lavender pink, an entirely new color never before seen in Buddleias. On bright sunny days they appear clear pink, while in floral work under electric lights they are a pleasing soft pink. In basket work or the larger types of floral designs this Buddleia can be used as the main flower; because of its desirable color it blends beautifully with light blue Delphiniums or practically all seasonable flowers. We very highly recommend that you make a planting of this remarkable new Buddleia Charming.

OCHRULEUCA IRIS**New California Type
For Cut Flowers**

Recently it was brought to our attention that this type of Iris is of great value for cut flower purposes. We purchased our plants in California where for many years these Iris commanded high prices on the cut flower markets. When our plants were in full flower the first part of June, we sent a few bunches to the wholesale market and they immediately sold at a high price. All indications are that they will command a good price for many years. They are exceptionally hardy and will grow in fairly heavy or loamy soil; moisture is beneficial. We are pleased to offer you the following range of colors at attractive prices.

Peonies

For early spring plantings we market large quantities of Peony roots. It seems that each year more and more Peonies are being planted during the spring planting season. We are prepared to take care of a good lively demand this spring. Our plants are young and contain the full amount of vitality as we do not market cut flowers.
